

Doncaster Sheffield Airport Case Study

Company name - Dewhurst Airfield Services Ltd

Client - Doncaster Sheffield Airport

Project Overview

Dewhurst Airfield Services was engaged to deliver Aeronautical Ground Lighting (AGL) works at Doncaster Sheffield Airport, supporting the enhancement and reliability of airfield lighting infrastructure.

Scope of works

The project included:

- Installation and upgrade of AGL systems across key airfield areas
- Integration of cabling, fittings, and associated infrastructure
- Electrical installation and system configuration

Delivery and execution

Works were delivered in a live airport environment, requiring careful coordination and adherence to strict safety and operational standards.

Dewhurst Airfield Services ensured efficient delivery through structured planning and experienced project management.

Outcome

The project delivered:

- Improved AGL system performance and reliability
- Enhanced operational capability
- A compliant and maintainable lighting infrastructure
